

STANDARD STRATOCASTER® ALIGNMENT TEMPLATE

Align this template with your pickguard to verify compatibility. Small variances of 0.10" or less won't be an issue. Anything greater than 0.10" may require bending the harness. If the holes in your pickguard are smaller than the holes on this template you may need to enlarge the holes.

Make sure to print at 100% scale and measure the 1" box to double check your printout has printed to scale. If your print settings are set "Fit to Page" the measurements will be incorrect.
